

PORTABLE AIR COMPRESSORS GOING BEYOND THE BARN

GOING BEYOND THE BARN

After a long day out in the field, make equipment clean up quick and easy with an Atlas Copco Portable Air Compressor. Whether you choose to blow down all the excess cotton, dirt and debris in the field or back at the barn, the Atlas Copco XAS 110 or 188 portable air compressor makes air accessible *anywhere*. Available in both a trailer or a truck mount configuration, the uses for a portable air compressor goes well beyond the barn.

Benefits of using a portable air compressor:

- Prevent fires by safely cleaning excess cotton, dirt and debris from strippers, module feeders and other tractor equipment
- It's lightweight, maneuverability and small footprint makes storing easy
- The 110 CFM delivers enough air volume to get the job done but at a lower cost and considerably less fuel usage.
- If more air is needed the 188 CFM has the highest volume in its class (compared to 185 CFM machines)

EASY TO USE

The Atlas Copco XAS 188 has integrated a toolbox inside the lockable canopy to store air nozzles and other equipment, an external lifting eye for easy lifting, user-friendly controller, and canopy that opens 60° for easy access to all internal components and quick service.

INCREASE YOUR UPTIME

Brandon and Clark is always here for your air compressor service needs, but servicing the Atlas Copco XAS 110 and 188 portable compressor can be completed in less than 1 hour! With the cold weather option, service intervals of the XAS model increases from 1000 hours to 1500 hours or 2 years. In between the service intervals, the XAS line of compressors gives full peace of mind as the 110% fluid containment under-carriage avoids any spills.

FEATURES AND BENEFITS	XAS 110	XAS 188
Spin-on type oil filter and separator filter, no special tools needed	●	●
Guaranteed service in under 60 minutes	●	●
Service needed only every 1,000 hours	●	●
Battery cut off switch for safety and longevity	●	●
Anti-air lock system for easy starting	●	●
Starter motor protection system	●	●
Unique base-frame design made from one single sheet of steel with no welds or joints	●	●
C3 corrosion protection coating	●	●
110% spill containment system	●	●
Equipped with pintle hitch, ball hitch available separately (2" or 2-5/16")	●	●
Durable and proven Kubota diesel engine	●	●
Heavy duty tires standard on all Atlas Copco models	●	●
110 CFM @ 100 PSI	●	
1,100 pounds with fuel	●	
No Diesel Particulate Filter for after fuel treatment	●	
No DEF fluid required	●	
188 CFM @ 100 PSI		●
Intuitive 4 button controller navigation		●
2,100 pounds with fuel		●
Internal tool box		●
